Professional Summary

Software Engineer with hands-on experience in building full-stack web applications using the MERN stack (MongoDB, Express.js, React, Node.js). Skilled in developing scalable applications, designing RESTful APIs, implementing CRUD operations, and integrating front-end with back-end services. Passionate about writing clean, efficient code and continuously learning modern web technologies. Seeking opportunities to apply and enhance development skills in real-world projects.

Technical Skills

Languages: HTML, CSS, JavaScript, C++

Backend Technologies: Node.js, Express.js, Nest.js

Frontend: React.js, JavaScript, CSS, Responsive Design

Databases: MongoDB, PostgreSQL

Tools: Git, GitHub, VS Code, Postman, Vercel

Core Skills: REST API Development, CRUD Operations, Authentication, Database Design, Responsive UI Development, Team Collaboration

Experience

Full Stack Developer Lahore, Pakistan
Senew Tech *Jun 2026 – Sep 2026*

- Developed and maintained full-stack web projects using MongoDB, Express.js, React, Next.js, Nest.js and Node.js in a professional team environment.
- Built and consumed RESTful APIs, implemented CRUD operations, and integrated frontend components with backend services.
- Collaborated with senior developers using Git version control and agile workflows to deliver features on schedule.

MERN Stack Intern Lahore, Pakistan
Amrood Labs *Apr 2026 – Jun 2026*

- Gained hands-on experience with the MERN stack (MongoDB, Express.js, React, and Node.js) through structured training and practical assignments.
- Practiced building RESTful APIs, implementing CRUD operations, and connecting frontend applications with backend services.
- Learned industry-standard development workflows, including Git version control, code reviews, and collaborative software development practices.

Projects

WorkPulse Employee Management System | *React, Nest.js, PostgreSQL, Better Auth* *Live Demo*

- Developed a comprehensive employee management and attendance platform from the ground up, enabling organizations to manage employees, contracts, attendance, salaries, and paid leaves through a centralized system.
- Built a dynamic attendance management system with configurable attendance rules, office timings, late arrivals, short leaves, early checkouts, working hours, and location-based check-in/check-out validation.
- Implemented contract-based employment management, allowing administrators to define employee contracts, salary structures, paid leave allocations, and employment-specific policies.
- Developed an administrative control system that provides authorized administrators with complete control over employees, contracts, attendance rules, locations, salaries, reports, and system configurations.
- Built attendance and salary reporting features to track employee working hours, attendance records, leave deductions, and contract-based salary information.

- Implemented secure authentication and role-based access control using Better Auth, with separate capabilities for employees, sub-admins, and super administrators.

Nomad Recruitment Platform | *React, Nest.js, PostgreSQL, REST APIs* *Live Demo*

- Worked on a full-stack recruitment platform, implementing client-requested changes and resolving functional and UI issues across recruiter, agency, company, candidate, and admin portals.
- Investigated and fixed bugs related to subscriptions, job management, interviews, payments, filters, dashboards, localization, validations, and user workflows.
- Developed and refined React frontend features and integrated them with Nest.js REST APIs and PostgreSQL database services.
- Collaborated with the development team using Git and agile workflows to test, debug, and deliver fixes and enhancements.

AI ATS Analyzer Platform | *React, Node.js, MongoDB, Tailwind CSS, Gemini API, Resend* *Live Demo*

- Built a full-stack AI-powered ATS analyzer that evaluates uploaded resumes against job descriptions and provides ATS compatibility feedback using the Gemini API.
- Integrated the Gemini API to generate personalized cover letters by matching resumes with job descriptions and exporting professionally formatted PDF documents.
- Developed a secure dashboard with JWT authentication, resume management, AI analysis history, and class-based dark mode support.
- Implemented OTP verification and password reset workflows using Resend email services with a custom domain for secure user authentication.

SkyCast Weather Dashboard | *React, Vite, Tailwind, Axios, WeatherAPI* *Live Demo*

- Built a responsive React/Vite SPA that delivers current conditions and multi-day forecasts via WeatherAPI, with city search, geolocation, and metric/imperial toggles.
- Implemented a `useWeather` state machine to manage loading/success/error flows, unit-aware fetching, and normalized API responses for stable UI rendering.
- Designed a glassmorphic UI with Tailwind, dynamic gradients/backgrounds driven by weather codes, and recent-search chips persisted in localStorage.

Education

Superior University Lahore, Pakistan
Bachelor of Science in Software Engineering *2022 – 2026*

Achievements

GitHub Portfolio – 40+ public repositories showcasing frontend and web applications

Team Collaboration – Experience working with version control workflows and agile practices
